SUPPORT YOUR LIBRARY

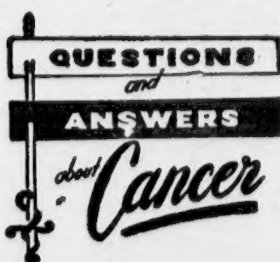

The Board of the Carbon Public Library held a meeting Sept. 15th. The Board is made up of the following: Chairman, Mrs. D. Prowse; Sec.-Treas., John Appleyard; Librarian, Mrs. Saunders; and five board members representing the five organizations in town—Rev. Bruce Hotchkis, The Lions; Mrs. Otto Martin, Home and School; Mrs. Alice Switzer I.O.D.E.; John Appleyard, Legion and until someone is elected Walter Mucha will represent the Students' Union; likewise Mrs. Walter Perman will represent the Ladies' Auxiliary.

The main topic for discussion on Tuesday was ways and means of raising money to buy books and to fix up the back of the building for a reading room. No definite agreement was come to on how this would be worked out. Our next meeting Thursday, October 20th.

Remember, residents of Carbon and district, every dollar we spend up to \$300.00 on books the Alberta Government gives our library a dollar for dollar grant. So, with your support of becoming a member for one dollar a family a year, we should not have too much trouble raising this much needed money. We have over seventy members right now, but there are many more families in the district not members as yet. Are you a member?

Don Pattison of Edmonton spent the past week visiting with his sister, Violet.

BORN—To Mr. and Mrs. Charlebois on Sept. 21st in the Drumheller hospital, a daughter.

Mr. and Mrs. Clarence Hay were visiting friends and relatives in Carbon over the weekend.

Mrs. J. Redgewell of Hesketh is a patient in the Drumheller hospital. We wish her a speedy recovery.

Mr. and Mrs. Switzer and family accompanied by Mrs. Switzer, Sr. returned home after spending the weekend in Calgary.

Mrs. Gladys Jones of Kimberley, B.C. is visiting at the home of her sister and brother-in-law, Mr. and Mrs. Sam Garrett.

Mr. Ralph Atkinson and son Stewart of Edmonton were visiting at his brother and sister-in-law, Mr. and Mrs. Jack Atkinson. Ralph was out testing at the well on the Ed Ziegler farm.

Mr. George Appleyard Sr. celebrated his 70th birthday Monday, Sept. 14th with a family dinner at the home of his son and daughter-in-law, Mr. and Mrs. Joe Appleyard, after which an open house was held for the Carbon Old Timers to wish him birthday greetings.

POPE LEASE

By E. B. Andrew
Mr. and Mrs. A. Burns, oldtimers of this district, have sold their farm and have taken up residence in Calgary. Prior to their departure they were presented with an electric table lamp.

Miss Rose Steward, bride-elect of next month, was the recipient of gifts at a shower given in her honor by Mrs. J. Peterson of Hesketh.

INFORMATION SERVICE DEPT. OF AGRICULTURE BUSH CUCURBITS

Ottawa, Sept. 18, 1953—Considerable emphasis in squash and cucumber breeding has been placed on introducing bush or determinate types at the Experimental Station, Morden, Manitoba. Interesting breeding material is in the third and fourth generation of selection, says V. W. Nuttall of that Station.

Bush cucurbits (the name applied to the plant family which includes gourds, cucumber, squash, etc.) like bush tomatoes or smaller or dwarf vegetables have distinctive merit and appear to be well adapted to prairie culture. The main feature of bush cucumbers at the Morden Station is that plants reach a mature size earlier than the vining sorts. This appears to result in earlier flowering and earlier fruit set. Fruits also appear to develop faster. Although in most instances the yield from an individual bush plant is lower than that from a vining type, this lower yield can be offset by closer

Mr. and Mrs. J. Redgewell and sons, Wilson and Robert motored to Lethbridge last weekend. Robert remained there where he is employed with an accounting firm.

Labor day visitors to this district at the home of Mrs. H. H. Crowell were: Miss Gladys and Mr. Mel Crowell; Mr. D. Goldseldt; Mr. and Mrs. J. Crowell and Myrna; at the Edwards home, Mrs. S. Wise, Mr. and Mrs. G. Fiske and children of Calgary; at the E. Grenier home, Mr. and Mrs. K. Boddy and children of Calgary.

Miss Yvonne Andrew, R.N. of High River is home for a month's vacation.

Mr. and Mrs. D. Margach, old time residents of this district, were recent visitors at the Allan Church home.

The Pope Lease W.I. held their September meeting at the home of Mrs. W. G. Edwards. The handicraft list was discussed and Mrs. J. Redgewell read a paper on RH Factor Incompatibility. Mrs. J. Redgewell won the tea prize.

er spacing of the bush plants, both within and between rows. Several plant lines have had a predominance of female rather than of male flowers, which results also in increased yield of fruit. Bush cucumbers are much more easily handled at harvest time since there is no tangling of vines with which to contend and fruit is usually borne close to the crown of the plant or at short intervals along the much restricted vine.

An important feature of bush squash is that it requires decidedly less ground area than the long vining type. No trouble is encountered with vines rambling over other vegetables in the garden plot, climbing the back fence or growing over into the neighbor's lot. Similar to bush cucumbers, bush winter squash plant lines at Morden demonstrated ear-

lier fruiting and maturity than the standard vining types. These features are of great importance particularly in the more northerly regions since many vining varieties rarely mature more than 50 to 75 per cent of fruit set before the first killing frost.

Winter squash will store much more readily if the skin is hard and if they can be harvested before the first killing frost.

Medium fruit size on bush squash is more acceptable to the average home gardener than the enormous 20 to 30 pound fruits produced on some vining varieties. Quality of smaller fruits generally appears to be superior with special regard to smoothness of texture.

Both bush cucumbers and bush squash should be available to the home gardener in the near future. It is anticipated that both will quickly gain in popularity when their merits have been widely demonstrated.

Hunters Urged To Take Care Against Shooting The Rare Whooping Crane

An urgent plea to hunters to take every possible precaution against the shooting of the rare Whooping Crane was issued by Saskatchewan Provincial Game Commissioner E. L. Paynter. Mr. Paynter, in issuing the statement, reminded hunters that the Whooping Cranes, of which there are only 21 known to exist, can be expected over Saskatchewan and Alberta on their migration journey south.

The Provincial Game Commissioner pointed to some grim statistics which sharply accentuate the problem of saving the Whooping Crane from absolute extinction.

During 1950, 1951 and 1952, a total of 24 of the birds were lost. This is 45 per cent. of all that died or were killed since 1938 and was an average loss of eight birds per year—a disturbing fact since the Whooping Cranes are so small in number.

Last year, a "Whooper" was shot in the Griffin area of Saskatchewan and although it was alive when found, it died later from its injuries at the Aransas National Wildlife Refuge in Texas. "This year," said Mr. Paynter, "it is earnestly hoped that no reports of Whooping Cranes injured by the guns of hunters will be received."

There is little excuse for mistaking the majestic "Whooper" for another species, since the bird's markings are distinct. The Whooping Crane stands more than four feet high, has a wing spread of seven feet and flies with neck and legs out straight.

The Whooper is white in color except for black tips on the wings and a bare red crown. It has black legs and a yellow bill.

Mr. Paynter, in pointing up the need of protecting the few remaining Whooping Cranes, quoted population statistics which clearly

indicates that unless something is done the extinction of the bird is inevitable.

The statistics quoted here are from an article in a recent issue of the North Dakota Outdoors. According to the article, the first comprehensive inventory was taken in 1938.

This inventory, taken by the newly-established Aransas Waterfowl refuge, dealt only with the migrant flock and did not include Whooping Cranes being kept in captivity.

In late April, 1939, 18 Whooping Cranes took off from the refuge and since that time this flock and their progeny have made 14 migrations northward.

In those 14 years this small flock of cranes have reared a total of 57 additional young and brought them safely from the Canadian northland to the distant Texas coast.

However, during the same period a total of 53 Whooping Cranes were lost. In 1945, there were 35 whoopers known to exist, but since then this figure has declined steadily until today, there are only 21 known living Whooping Cranes.

"With so few of these majestic birds left in existence," said Mr. Paynter, "it is urged upon hunters to take every precaution to preserve the presence of the Whooping Crane."

Mr. Paynter also emphasized that should anyone spot one or more Whooping Cranes, the nearest Conservation Officer or Royal Canadian Mounted Police representative should be contacted immediately.

Suzanne Lampert Puts on Blue Bonnet — Votes it best

Suzanne Lampert prefers BLUE BONNET Margarine to any spread at any price! She enjoys it all the time. And like the daughter of Toronto's famous mayor, you will love BLUE BONNET's fresh, sunny-sweet flavor. You'll be delighted with the nutrition of this fine quality all-vegetable margarine. And you'll find BLUE BONNET really helps your food budget. Take a tip from women who can afford the best and buy the best: ask for BLUE BONNET Margarine. Available in regular economy package with color wafer. Also in the famous YELLOW QUIK bag for quickest, cleanest coloring.

BT-53

Corn Magic

With corn plentiful and not expensive, here is a tip or two on preparing the most delicious roasted corn this side of heaven! Here's how . . .

Dehusk, brush each cob with melted butter, sprinkle liberally with salt and pepper to taste and a little paprika for eye appeal. Then wrap each ear in household foil and place on the rack in a 400 degree pre-heated oven. About 30 minutes of unattended baking will bring the corn to its tender best.

Seasoning the cold corn allows the flavor of the butter and condiments to soak right into every succulent kernel on each cob. And the rich flavor is sealed in. There are no pans to wash, no oven to clean. And you serve the corn wrapped in the cooking foil so that each ear is hot and buttery for "seconds", maybe "thirds".

Platinum originally was discovered in South America. 3055

Funny and Otherwise

Mrs. Robinson was very interested in the new family who had moved into the neighborhood, and told her husband:

"They seem such a devoted couple. He kisses her every time he goes out. 'Why don't you do that?'"

"Good Heavens," replied her husband. "I don't even know the woman yet."

"Did your grandfather live to a green old age?"

"I should say so! He was swindled three times after he was seventy."

Woman's voice (on phone)—Is this the telephone company's Service Department? Well, my phone cord's all knotted up; it's far too long. Try giving it a pull at your end.

After the family had been increased to three it was decided to employ a girl as nursemaid. "My husband is very particular who we engage," said the mistress to the girl who applied for the job. "Are you faithful? Have you a kind and loving disposition? Will you—"

"Excuse me, madam," said the girl, "but am I to take care of the baby or your husband?"

Tommy was asked the difference between prose and poetry. He pondered for a while and then said: "There was a young man named Rees, who went into the sea up to his ankles."

"That's prose," he said. "But if the water had been a few inches higher it would have been poetry."

A young man advanced nervously towards his girl's father.

"I—I want to marry your daughter," he stuttered. "What?" shouted the irate parent. "Marry my daughter? What on earth do you mean? You . . ."

"Now, now," soothed the youth. "Don't talk like that. You're prejudiced against her. She's all right, really."

A young married couple, Mr. and Mrs. Barr, were devoted to their respective hobbies. He was an enthusiastic cyclist, while she played the piano. They had a son, and both desired to christen the youngster with a name that would embrace their favourite pursuit. After much thought the husband exclaimed: "I've got it! We'll call him Handel Barr!"

Weekly Tip

SCORCH REMEDY

Vinegar can bring you back into your husband's good graces, too, should you scorch his best shirt in ironing. Rub the brown spot lightly with vinegar then wipe with a clean cloth — the scorch will disappear.

SCHOOL DAYS

Do You Know That . . .

The moon is brighter in the first quarter than in the third quarter, because the eastern half of the moon has more dark areas that reflect less light.

St. Walburg Enterprise Starts Its 21st Year

With the issue of September 3, the St. Walburg Enterprise started its 21st year under the editorship of A. Vinge. Editor Vinge says "We start on Volume 21, and still going strong. Twenty-one years is a long time for a person to stay in one place but we have enjoyed every minute."

If You're TIRED ALL THE TIME

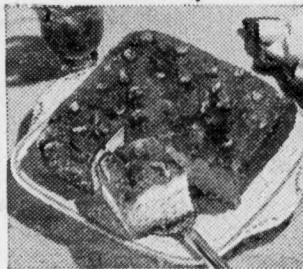

Everybody gets a bit run-down now and then, tired-out, heavy-headed, and maybe bothered by backaches. Perhaps nothing seriously wrong, just a temporary toxic condition caused by excess acids and wastes. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys, and so help restore their normal action of removing excess acids and wastes. Then you feel better, sleep better, work better. Get Dodd's Kidney Pills now. Look for the blue box with the red band at all druggists. You can depend on Dodd's. 52

NEEDS NO REFRIGERATION

Basic COFFEE CAKE Dough

Scald

2 cups milk
Remove from heat and cool to lukewarm. In the meantime, measure into a large bowl
1/2 cup lukewarm water
2 teaspoons granulated sugar
and stir until sugar is dissolved. Sprinkle with contents of
2 envelopes Fleischmann's Fast Rising Dry Yeast
Let stand 10 minutes, THEN stir well. Stir in lukewarm milk and
4 well-beaten eggs
1 teaspoon vanilla
Sift together twice
7 cups once-sifted bread flour
1/2 cup granulated sugar
1 tablespoon salt
Stir about 6 cupsful into the yeast mixture; beat until smooth and elastic. Work in remaining dry ingredients and 2 1/2 cups (about) once-sifted bread flour
Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in a warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 4 equal portions and finish as follows:

1. CINNAMON SQUARE

Combine 1/4 cup granulated sugar and 1 tsp. cinnamon; sprinkle on board. Place one portion of dough on sugar mixture and roll into a 12-inch square; fold dough from back to front, then from left to right; repeat this rolling and folding twice, using a little flour on the board, if necessary; seal edges. Place in greased 8-inch square pan; press out to edges. Grease top. Cover and let rise until doubled. Cream 2 tbsps. butter or margarine, 1/4 cup granulated sugar and 1/4 tsp. cinnamon; mix in 1/4 cup broken walnuts and 1 tsp. milk. Spread over risen dough. Bake at 350°, 30 to 35 mins.

2. APRICOT FIGURE EIGHT

Combine 1/4 cup brown sugar, 1 tsp. flour, 1/4 tsp. mace and 1/4 cup finely-chopped nuts. Roll out one portion of dough into a rectangle about 22 by 6 inches. Spread with 2 tbsps. soft butter or margarine; sprinkle with nut mixture. Fold dough lengthwise into 3 layers. Twist dough from end to end; form into figure 8 on greased pan. Grease top. Cover and let rise until doubled. Bake at 350°, about 30 mins. Fill crevices of hot figure 8 with thick apricot jam; spread other surfaces with white icing; sprinkle with nuts.

3. FRUIT COIL

Knead into one portion of dough, 2 tbsps. grated orange rind, 1/4 cup raisins, 1/4 cup chopped nuts and 1/4 cup well-drained cut-up red and green maraschino cherries. Roll out dough, using the hands, into a rope about 30 inches long. Beginning in the centre of a greased deep 8-inch round pan, swirl rope loosely around and around to edge of pan. Brush with 2 tbsps. melted butter or margarine; sprinkle with mixture of 1/4 cup granulated sugar and 1 tsp. cinnamon. Cover and let rise until doubled. Bake at 350°, 35 to 40 mins.

4. SUGARED JELLY BUNS

Cut one portion of dough into 12 equal-sized pieces. Shape each piece into a smooth round ball; roll in melted butter or margarine, then in granulated sugar. Place, well apart, on greased pan; flatten slightly. Cover and let rise until doubled. Form an indentation in the top of each bun by twisting the handle of a knife in the top; fill with jelly. Cover and let rise 15 mins. longer. Bake at 350°, 15 to 18 mins.

Conscience Money Brings U.S. Up To \$250,000 Per Year

WASHINGTON. — A middle-aged woman wrote to her Uncle Sam, confessing that as a teen-ager she had steamed cancelled stamps off letters and sent them back through the mails. She enclosed a dollar and promised it would "never happen again".

The money went into the treasury's "conscience fund". Its annual take runs from \$30,000 to \$250,000. Many of the letters are unsigned. Most of them apologize for wrongdoing.

One man sent in \$50 and said: "Dear sir: Enclosed find money to pay for articles I appropriated without your knowledge." He signed the note "A Repentant Thief".

A woman sent in some cash "on

account". She said she would continue to contribute to the fund until her "act" was settled. That was some time back and the money is still coming in "on account". She never did explain what her sin was, or sign her name.

An unknown person mailed \$111 "for payment for articles taken from a warehouse and given to me. I should have known better. I have had no use for the hot water bottles since I accepted them."

A navy veteran, now retired, said that in 25 years in blue he had stolen some pencils, writing paper and "some discarded table cloths." The man calculated the value of the loot, added six per cent. interest and figured he owed about \$40. He threw in another 10-spot "for good measure".

A number of former GI's sent in money for clothing they carried at the time of their discharge.

A gentleman said that once he had taken a trip abroad without paying any duty. The value of the things he had bought totalled \$29. He sent the keeper of the nation's conscience \$3, explaining that he understood the levy should have been 10 per cent.

A lady sent in \$50 in cash and said "kindly accept". She didn't explain.

The fund receives everything from one-cent stamps to large amounts of money. The biggest sum ever received was certified check for \$30,000. The man dictated a long, intelligent letter to his secretary, confessing that across the years he had fudged on his income taxes and wanted to ease his mind by paying up.

The government accepted his detailed accounting of the money due.

A former soldier sent in \$25 for things he had stolen while in the service, along with the note, "if this ain't enough let me know and I will fix you up." The government took the boy's word for it.

The latest letter to come to the fund was from a soldier and contained a ten-dollar bill, "to pay for a toilet seat I stole from a GI barracks."

FAITHFUL CHURCHGOERS

WADENA, Sask.—Wadena bids fair to become known as the "Town of Churches". With a population of less than 1,300, the town now has eight churches representing various Christian denominations.

On The Side

By E. V. Durling

Great Britain has a record of the first person ever killed in an automobile accident in that country. Accident happened Aug. 17, 1896. Victim was named Mrs. Bridget Driscoll. She was knocked down by an automobile near the Crystal Palace in London. The automobile was travelling at the time at a rate of between four and a half to eight miles an hour!

To Win Her Affection

Every woman has what she believes are her "good points". That is, she is proud of her eyes, her hair, her figure, or her smile. She might think when it comes to legs she is another Dietrich. Keep this in mind, young fellow. Find out what the girl considers her "good points", then praise them. Then tell her she has a good sense of humor, excellent style sense and that there is an "air of mystery" about her. And you will get off to a very good start in capturing her affectionate regard. This technique works well, even with women with green-gray eyes, who are usually the most difficult to impress.

Good Fight To Lose

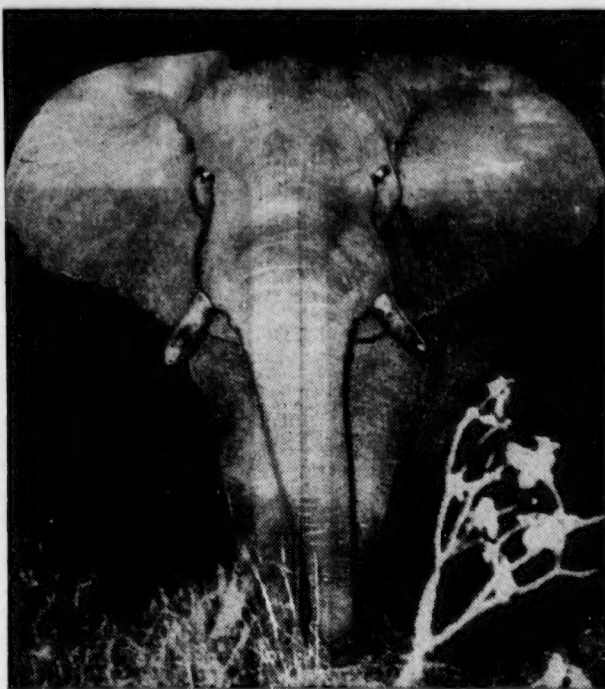

Know any young women who were June brides? How are they doing? It is during the first year the question as to who is going to wear the pants in the family is usually decided. To hand is a communication from a New Yorker who was a June bride five years ago. She confesses she battled to dominate her husband during the first year. She lost. "That was a happy defeat for me," she adds. Says her marriage is a huge success, with her husband the top authority in the household. That's the way it goes. If the wife loses the battle for domination, she is usually happy. If she wins, she is not so happy, having no real respect for the man she dominates.

Work and Stay Slim

A 26-year-old mother of three children has the same measurements as when she married at 19. That is possibly not unusual. However, the young matron's explanation for keeping her school-girl figure is interesting. She says it is because her physician prescribed special exercises for her before and after the births of each of her children. In a general way, that is not unusual either. However, the chief exercise the physician recommended for keeping a streamlined figure was housework. Call this to your wife's attention if she has been worrying this summer how she looks in a bathing suit.

Mistresses of the Art

The women of what nation are the most accomplished flirts? It is generally said the French women should have that rating. I don't agree. I believe it is the English women. What makes an English woman dangerous in a flirtation is that she usually has her emotions well under control. She can plan to be "hard to get" and follow it through. Many women resolve to be difficult to conquer, but their emotions get the better of them. An English woman knows how to play with fire. It must be kept in mind that Casanova, who had made conquests of hundreds of women on the continent, was made a fool of by an English girl. This young woman led the great Casanova on until he had spent all his money and then gave him the air.

MAD JUMBO—This head-on picture of a mad elephant was made by an intrepid photographer accompanying game wardens in South Africa's Kruger National Park recently. This elephant and others broke through an enclosure of the Letaba camp reserve to feed on palm trees. The photographer remained just long enough to make this dramatic shot from a distance of 25 feet and then immediately made his departure.

Orient Express Still Train Of International Mystery

(By RICHARD O'REGAN)

BUCHAREST. — The Airlberg-Orient Express, Europe's train of international mystery and intrigue, has become more sinister than ever. It is still a carrier of conspiracy between East and West, but gone are the voluptuous Mata Haris of the past and the monocled German agents of the Erich von Stroheim type. Gone, too, are the gay crowd of Balkan princes, wealthy Western business men and junketing dowagers.

The Iron Curtain has changed all that. International agents had spies use other means than the famous train to travel in and out of East Europe.

The train's new sinister nature has another character. As it crosses the Iron Curtain four times a week on its 1,600-mile run from Capitalist Paris to Communist Bucharest, it takes on all the cold bleakness and concealed terror of a Red police state.

On its eastward trip, it disgorges in Vienna the last exhausted tourists and travellers who haven't a care about the East. It sheds its dining car and most of its carriages and waits until late at night before it undertakes to penetrate the dark uncertainties of the Communist world.

In the waiting time, a mere handful of passengers creep aboard. The train frequently leaves

with no more than two or three travellers. More often than not, they are diplomats, couriers and messengers.

Austrian conductors say that once in a while a Western business man bound on a questionable deal with the East gets on. Then there are Western Communists, sneaking in and out of East Europe with Hungarian visas stamped on pieces of paper, instead of in their passports, so their governments will not know.

At the Austro-Hungarian frontier Austrian trainmen, conductors and the porter of the solitary wagon-lits car get off and trusted Communist railwaymen take over.

At Hegyeshalom, the first Hungarian frontier station, the traveller first feels the oppressive presence of the Communist police system.

Hungarian border guards, guns ready, post themselves at each car. Custom officials begin their search. They unscrew the light-bulbs, look behind mirrors, under seats and in every closet. Baggage—except for diplomats, Communists and favored guests—is examined minutely. Pass-ports officials take away your documents and the train waits four hours before you get them back.

If you are a doubtful Westerner—like American correspondents—a secret policeman gets on board and watches you constantly. Another apparently telephones to Budapest because when you arrive in the Hungarian capital, there's a plainclothesman on hand to stop you leaving the station.

Strictly Fresh

Some people you just can't ask for advice; they never tell you what you want to hear!

Marbles is a fine game for children. It teaches them to knuckle down to their task.

A prisoner who soaped himself thoroughly in an attempt to squeeze through the Cache

County, Tex., jail bars, is back in his cell. Guess the authorities felt he hadn't come clean yet.

A fool is one who won't get wise to himself.

Nourishing School Lunches

(By MARY MOORE)

When your youngsters are no longer little, but 19 and 20 years of age, you have to be satisfied with standing at the front door on the first day of school and watching younger mothers' little ones start off.

This fills me with nostalgia. Is it because those days are gone forever? We must be perverse and contrary—or I must be—for I can remember wishing with all my heart that my two would grow up—and now I'm not so sure. They are so independent and absolutely bursting with plans.

David, my friend Eleanor's boy of five, is starting to school. That leaves her little Roddy of two years for me to love to my heart's content, for he is such a dear little player with a deep down chuckle.

These little city-dwellers do not have to carry lunches but there are thousands of children who do in rural communities and at the high school level.

Get them off to a good start this year by making their sandwiches of 100 per cent. wheat bread, and giving them every day at least one fresh fruit and one fresh salad vegetable in their lunches.

Do not settle for sandwiches that are no nourishing. Their sandwiches should contain butter or margarine and be made of meat or fowl or fish or eggs or cheese or nuts. Not such questionable fillings as jam or commercial sandwich spreads (which are largely boiled dressing or mayonnaise).

A PORTRAIT OF SHAH REZA, father of the young Shah Mohammed Reza Pahlavi, sits atop the monument base from which the elder Shah's likeness was toppled by pro-Mossadegh forces during the early part of rioting in Tehran, Iran. Supporters of the young Shah, who later regained power, replaced the toppled statue with a portrait after sweeping out the government of Premier Mohammed Mossadegh. The legless statue of the old Shah rests alongside the base.

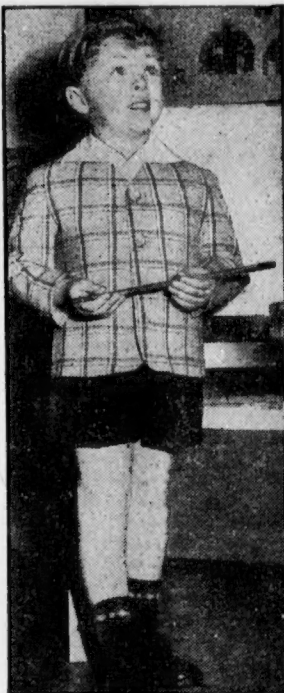

THESE ARE FOUR STUDIES of V. K. Krishna Menon, India's delegate to the United Nations, as he reacted to voting by the political committee as to whether his nation gets a seat at the Korean peace conference table. The crucial vote was 27-21 with 11 abstentions, giving India a majority on the committee but falling short of the two-thirds majority required in the General Assembly. The American-backed plan, limiting peace talks to the belligerents, plus Russia on the Communist side, was adopted instead.

NO PLACE LIKE HOME—So the Turners and Kullboms of Oakland, Ia., took theirs with them on a vacation trip to Canada. Here Mrs. C. S. Kullbom stands in front of the home-on-wheels built by her son-in-law, Wendell Turner. Photo was taken in Chicago, Ill.

HANDY FARMER—Simon Hagemann, a Lebanon, Ill., farmer, greases the power-driven side-delivery rake he made before taking it into the fields. Hagemann, who makes all his own farm machinery, says that he began building the power-driven device which the rake contains before farm supply companies thought of the idea.

SCHOOLTIME TOGS—A fashionable back-to-schooler is this youthful artist wearing a smart checked Eton jacket by Chips and Twigs. Made of wool and orlon, the jacket is washable and comes with contrasting trousers.

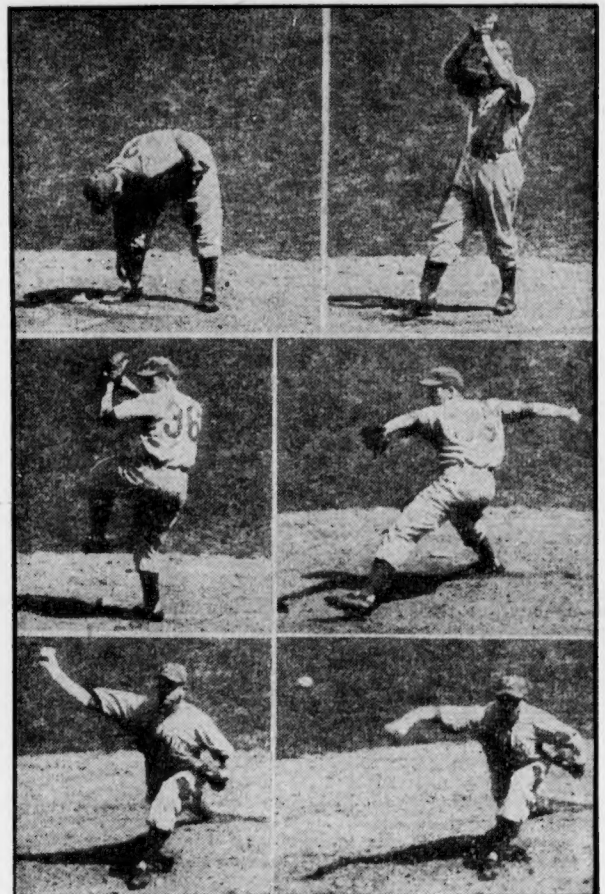

EVIDENCE — Eleven-year-old David Crafts of Cuyahoga Falls, Ohio, proudly holds onto a fin of the 542-pound Marlin he hooked in Hawaiian waters. The young fisherman fought his catch for two hours, and four others landed it after another five and one half hours.

EDITOR GETS RESULTS IN TRAINING SON IN NEWS GATHERING

We've been trying to instruct our youngest son (now nearly eight!) in the principles of news-gathering.

Just the other day he brought along his friend Lynn Read, about the same age, and Lynn had just discovered a small frog which had only one eye—and no sign of having ever had more. And for good measure Lynn also produced another little frog which had but three legs!—The Bashaw (Alta.) Star.

The Strategy of Condition

As we all know it is very important to get into the best possible condition if you are to play any game well, but what we will point out is the way that condition can be used as an actual form of strategy in many games. For example, it most certainly gives everyone a chance to make the competition a lot closer even though badly out-classed as far as actual skill is concerned.

To use condition as an actual form of strategy when playing your game you must first do everything possible to make sure the condition of the team, individual or group concerned is better than that of the opponent. The greater edge you have in condition the more effectively you can use condition as a strategy. To take advantage of an edge in condition you must make sure that you choose the style of play that brings the condition factor into the picture more effectively. Generally you try to sustain a pace of effort that is harder and faster and more aggressive than your opponents are trained to stand. By doing this you may get tired but not nearly as tired, nor will you get as tired as quickly, as your opponent. Then when

they begin to get tired you will have the big edge because when they are more tired than you their skill, energy and alertness will not be as great as yours. They might be ahead of you half-way through the competition but when they begin to fall apart from the tremendous pace they have had to stay with you it will be quite possible to take over completely. The activities in which endurance plays an important part are all middle and long distance running in track and field and swimming, and such games as tennis, football, soccer, basketball and also in boxing and wrestling.

The Change-of-Pace

The change-of-pace is one of the most effective ways to get past a tackler in football. The average ball-carrier always runs at one pace and that is as fast as he can when there are tacklers to beat. Practice changing your pace from medium to fast—from three-quarters to top speed—from top speed to slow, until you can go from one to another without breaking your stride. By practicing a change-of-pace from one speed to another you will be able to get through an opening and be away like a flash. The best time to use a change-of-pace is just as the tackler is about to make his lunge.

Extra Practice for Next Year

Don't stop playing baseball because your team or club is finished for the year. Instead, use these next few weeks to practice for next year. Practice hard at improving your hitting, throwing and fielding.

By the way, you can have a lot of fun if you and your friends get together and stage competitions to see who can throw most accurately at targets—to see who can place his hits the best and so on. Yes, this extra practice will pay off for you in a big way. So make up your mind to start this week.

We would like to remind all those who are not members of Sports College that all you have to do to become a member is to send us a note saying you would like to become a member. Send your note to Sports College, Box 99, Toronto 1, Ontario. Membership is free, everyone can join.

ALBERTA WILL REVERT TO ONE LICENSE PLATE

Next year, Alberta will revert to the annual single plate system in licensing motor cars. This has been officially announced by the provincial secretary's department. When the present system of annual tabs to be affixed to the plates was introduced, government officials described it as a permanent system. But experience has not been satisfactory in several respects.

In China the peach is the emblem of marriage. 3055

WEEKLY BIBLE COMMENT

THE LAST SUPPER

The Last Supper of Jesus with His disciples stressed the communion as the symbol of fellowship in the Christian church.

This is marked to such an extent that denominations, or sects, are called "communions", even in their very separateness which denies the unity that ought to be in Christ.

For that, or course, there are historic reasons, which to a large degree are being overcome by many who in mind, soul and heart accept as fellow Christians all who love the Lord, regardless of barriers of organization and formal creed.

But there ought to be even deeper implications of fellowship as we contemplate that Last Supper in the upper room.

That Last Supper was the celebration by Jesus and His disciples of the Passover, the most sacred rite in the Jewish religion, which was their heritage as Jews and which Jesus said He had not come to destroy, but to fulfil.

The fact ought to give the Last Supper a significance that it has never had, neither for Jews nor Christians, and a meeting place in fellowship that they have never found.

Surely the supreme task of all who believe in the Christ and fellowship of the upper room is to bring to reality and fullness in the world the spirit and the practice of brotherhood.

We know that there was one present in that room with Jesus who renounced that spirit, who betrayed his Master. What we do not realize is that everyone who professes to share in the communion, but who does not live in its spirit of brotherhood, is more akin to Judas than to those who loved their Master.

To partake of holy communion "in remembrance of Jesus" is not merely an act of conformity, an expression of outward faith. Its reality is found only in a renewed commitment of the soul to the Christian way—the way of brotherhood.

Kitchen Meditations By JANE DALE

PEPPER FOR MY EGG

If I may have some pepper
For my soft boiled egg
You won't have to worry
About all your fancy sauce,
Ketchup or mustard
Or even pickles sweet;
You don't need to fuss
With a relish or a salad,
Or any condiment
Served up with cold meat.
All I want is nice hot tea;
A slice of bread, I'll beg.
Then, best of all
Believe it or not—
A dash of pepper
For a soft boiled egg!

The average adult human body contains from eight to 10 pints of blood. Fat persons have relatively less blood than lean ones.

The average beehive produces 17 pounds of honey annually.

Fishing Still Good At Lac la Ronge

PRINCE ALBERT. — Despite steadily-increasing sport fishing pressure on Lac la Ronge, the average catch per angler is continuing to hold up and the "big ones" are biting as well as ever.

These are the facts revealed in a creel census, which the provincial fisheries branch takes annually on this popular northern sport fishing lake.

The current season's census shows that from May 16 to August 15, 4,874 anglers visited the resort, compared to 4,351 for the corresponding period last year.

The average catch per angler for the first four months of this season is slightly up—38.5 pounds compared to 37.6 pounds last year. The total poundage of fish taken by angling from May 16 to August 15 this season was 187,500 pounds, up from 164,410 pounds for the same period last year.

Evidence that "whoppers" are still taking the hook is the 41-pound trout taken earlier in the season by an American sport fisherman. Great northern pike weighing in at 22 to 25 pounds are being brought in daily by proud anglers.

With the coming of fall and cooler weather, fish are beginning to bite better than they did in July and August. During this two-month period, warm surface temperatures send game species, particularly trout, scurrying for the cooler water of deep holes.

TO TAKE ACTION FOR BROKEN BEER BOTTLES

MACKLIN, Sask.—Broken beer bottles thrown along the streets in town have got car owners up in the air. Buying new tires due to the thoughtlessness of some people has got beyond the joke stage and something drastic against these offenders is going to be the outcome if it continues. It not only affected tires but also was responsible for a cut foot caused by stepping on a piece of glass from a broken bottle lying on one of our streets.

Fashions

4652
10-20

A must! The two-piece dress that's crisp, cool, always smart. This one is slenderizing as a diet—peplum pockets accent the arrow-narrow sheath lines. If you wish, choose a checked gingham with a sparkling white contrast collar. You'll love it.

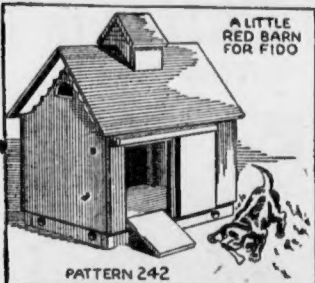

Pattern 4652: Misses' Sizes 10, 12, 14, 16, 18, 20. Size 16 takes 3 3/4 yards 35-inch; 3/4 yard contrast.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Prairie Publishers Limited,
60 Front Street W., Toronto.

Home Workshop

PATTERN 242

This miniature barn is forty-three inches long and twenty-eight inches deep. This is large enough to accommodate a dog of any size except those of the most heroic stature such as Great Danes and the like. Make this barn of outdoor plywood or other weather proof panels and paint it barn red with the scalloped cornices trimmed in white. It is so designed that no framing is used. Just saw out the pieces according to the dimensions on the pattern and nail them together. A full-size tracing pattern is given for the scallops which lend a smart effect to the finished job. Pattern 242 is 35 cents. Other outdoor features such as barbecue, name signs, cement stepping stones, storm sash and door canopy are all in Home Improvement Packet which is \$1.50 postpaid.

30-INCH WAGON
CONVERTIBLE TO
STAKE TRUCK
PATTERN 215

A rugged de luxe truck for Junior that is easy to make. This is the type of plaything that generations of boys have been proud to own. It may be a potential soap-box derby winner if you use eight-inch rubber tired disk wheels. Or make it entirely of wood scraps picked up around the home workshop, with metal fittings available at hardware stores. The bottom of the bed is plywood or solid stock may be used. Pattern gives large three-dimensional drawings of all parts and assembly procedure. A sturdy little pick-up truck that will last until Junior grows up. Use it for hauling in wood for the fireplace and for those trips to the grocery store. The pattern is 35 cents.

Send thirty-five cents (35c) for each pattern. Write plainly Name, Address and Number of Pattern. Send orders to:
Home Workshop Pattern Service,
Prairie Publishers Limited,
4433 West Fifth Avenue,
Vancouver, B.C.

DECODED INTELLIGRAM

1—Pearl Buck. 2—Boston. 3—Ares. 4—1927. 5—North America. 6—12. 7—New York. 8—34th. 9—Amsterdam. 10—Republican.

Ten Word INTELLIGRAM

Check correct word.

1. "The Good Earth" was written by (Sinclair Lewis) (Pearl Buck).
2. Fenway Park is in (Boston) (Concord).
3. (Jove) (Ares) was the Greek god of war.
4. Charles Lindbergh flew nonstop to Paris in (1927) (1925).
5. Lacrosse originated in (England) (North America).
6. Babe Ruth led home-run hitters for (12) (10) seasons.
7. (Ohio) (New York) has more colleges than any other state in the Union.
8. President Eisenhower is the (34th) (35th) U. S. President.
9. (Utrecht) (Amsterdam) is the capital of The Netherlands.
10. Warren Harding was a (Democrat) (Republican).

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Newspaper Delegates From Nearly Every Province Enjoy Visit To Sask. Parkland

REGINA.—More than 60 Canadian Weekly Newspaper Association delegates and their wives had the myth that Saskatchewan was nothing but flat prairie land exploded recently when they made a CWNA post-convention tour to northern Saskatchewan.

Representing weeklies from nearly every province in Canada, the delegates toured from Saskatoon in two buses to Prince Albert National Park and Lac la Ronge, which is 170 road miles north of the city of Prince Albert.

While guests of the Saskatchewan government at a post-convention tour luncheon near Prince Albert, the editors heard Hon. J. W. Burton, provincial secretary, and Hon. L. F. McIntosh, minister of municipal affairs, express the hope that the tour would be an eye-opener for those who had imagined Saskatchewan as a solely wheat-producing area. Delegates were told that there were more than 90,000 miles of rock and lake country in northern Saskatchewan.

Later that afternoon the editors saw for themselves the extensive parkland country of the province. First stop on the tour was at the buffalo paddock, in Prince Albert National Park. This park, in 1952, had more visitors to it than famed Jasper National Park in the Rockies. At Waskesiu, which is park headquarters, the newspaper party divided into two groups—one heading another 106 miles north to Lac la Ronge, one of Canada's finest lake trout waters.

During their stay at Waskesiu the newspapermen and families were the guests of the Prince Albert and Waskesiu boards of trade at a cocktail party and buffet dinner. Some of the delegates played a few rounds of golf as the guests of the national park, on a tricky Waskesiu golf course. In addition, the delegates were taken on a launch trip over Waskesiu Lake, and were taken on an extended bus tour through the park, which covers an area of over 1,400 square miles.

During the bus tour the newspapermen had ample opportunity to photograph various types of wildlife. Bears, deer and foxes were seen on the tour. A tour guide was supplied through the courtesy of J. D. B. MacFarlane.

Helpful Hints

Pull the knotted thread towards the needle and it will usually unravel without the slightest difficulty.

Add a little vinegar to the water when cleaning windows and they will stay clean for a longer time. More brilliance will be given if a little bluing is added to the water.

The skin will become puckered if the hands are kept in soapsuds for any length of time. To remedy this rub with either lemon or vinegar and they will be soft and white and it will prevent chapping.

An excellent substitute for whipped cream is to beat the white of an egg thoroughly, then add a well grated apple and sweeten to the taste.

Smile Of The Week

INFLATION

The little six-year-old was making her first visit to the country. The farmer's wife was taking her around the place. She saw the chickens, the garden, the barn, and ended at the pigpen where an enormous sow was reclining in the sun.

"Big, isn't she?" asked the farmer's wife.

"And I know why," replied the girl. "When I saw her yesterday, she had nine little pigs blowing her up."

ANSWERS TO QUICK QUIZ

ANSWERS: 5. In all provinces but P.E.I., Sask., and Alta. 3. Pulp and paper. 1. Cape Breton, Anticosti, Prince Edward. 4. Ontario. 2. The provinces will collect about \$1.2 billion; Ottawa will collect about \$4.5 billion.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

superintendent of Prince Albert National Park.

At la Ronge the delegates were the guests of the resort owners and restaurant people. One of the highlights of this part of the trip was a visit to the Churchill river—the river that was the main water highway for the early fur traders who passed through western Canada. Boats, motors and guides for this trip were supplied by the resort owners. After a 30-mile trip by water across Lac la Ronge, which has an area of over 450 square miles, the party saw the final spike being driven into a boat railway which will carry boats from la Ronge to the Montreal River, some 620 yards away. Although final work on the railroad has not been scheduled until about a week later, the road was completed specially so that it could be used by the CWNA party on its tour. This is the first railroad of its kind in Saskatchewan's Precambrian Shield country, and was pushed through by six men in six weeks. Before the railroad, a provincial department of natural resources project, was completed, it was impossible to take large boats across the rugged portage.

Another 10 miles by boat saw the delegates at Nistowiak Falls, one of the beauty spots of Saskatchewan's north. Here, the weekly editors were given an unusual luncheon through the courtesy of the department of natural resources. The luncheon consisted of the food regularly eaten by Saskatchewan smokejumpers—firefighters who parachute into forest fire areas. These grub boxes hold enough food for 10 men for one day—food that is nourishing and substantial. Such items as pilot bread, the modern version of hard tack, bully beef and pork and beans were included in the meal.

Immediately following the luncheon delegates took time off to try for first prize in an hour-and-a-half fishing derby. The winning fish, a 12-pound northern pike, was taken by John Pinckney, editor-publisher of the Rosetown (Sask.) Eagle. Later Ed Broom, manager of the Saskatchewan Gov't. Trading store at la Ronge presented Mr. Pinckney with a Cowichan sweater.

Back at la Ronge that night the delegates met with the camp operators for an outdoor supper of Arctic Grayling with trimmings. The grayling, one of extreme northern Canada's most prized angling trophies, were flown down to la Ronge specially for the dinner. Earl Dodds, northern districts field supervisor for the department of natural resources, had the fish flown down to la Ronge from Caran Lake, 180 miles northwest of the settlement.

The newspaper delegates made a real hit with the residents of la Ronge when they presented them with a money contribution toward a curling rink, which has long been a project of this northern community of 650 persons. In addition, a pair of curling rocks were promised by one of the convention guests, Adam Smith of Toronto. In return, the delegates were thanked by Harry Houghton, who spoke for the people of la Ronge. He promised that the first pair of rocks to be used in the rink would have the letters CWNA inscribed upon them.

While the outdoor supper was in progress the guests were entertained by a trio of native Cree musicians and dancers.

The following day all delegates returned to Prince Albert where they were shown through Lund's Wildlife Exhibit. 3055

- Manufacturing is the leading producer of wealth in what provinces?

Answers in Another Column

Chief function of a fish's air bladder is adjusting the specific gravity of the fish, thereby helping it to maintain its equilibrium.

Flock Testing In Manitoba To Get Under Way

Flock approval and blood testing of chickens in Manitoba will start October 1, it is announced by Hon. R. D. Robertson, Minister of Agriculture.

Applications are now being received and it is expected that more than 1,200 flocks of purebred poultry will be tested and approved this season by the Extension Service Branch of the Department.

Flock owners with modern hen-houses and purebred flocks of 100 or more pullets may contact the Extension Service, Winnipeg, for full particulars.

A refresher course for the field staff will be held at the University of Manitoba late in September. Representatives of the University Poultry Staff, the Federal Department of Agriculture and Provincial officials will conduct the course.

During last season's program, 1,271 poultry flocks were approved. The supply of hatching eggs from these flocks which numbered 343,867 birds, was sufficient to meet local requirements for chicks.

Light Sussex was most popular breed last year, followed by White Leghorns, Barred Rocks and New Hampshires.

Extensive and thorough testing of flocks has almost eliminated pullorum disease among Manitoba chickens. Mr. Robertson noted. Last fall, 1,264 of the flocks tested were found free of the disease which was a scourge among the chicken population just a few years ago.

Beekeepers Approve Honey Marketing Plan

Manitoba beekeepers have voted in favor of establishing a honey marketing plan in the province, it is reported by Provincial Apiarist D. R. Robertson.

In a referendum taken by mail by the Department of Agriculture between July 15 and August 1, 327 out of 432 registered beekeepers who voted indicated their approval of establishing a marketing board for their produce.

Only beekeepers who were registered with the provincial apiarist before June 30 were eligible voters, 432 cast their ballots. Eighty-eight voters opposed the plan and 17 ballots were spoiled.

Ballots were counted August 24 by returning officer D. R. Robertson. Scrutineers were Prof. A. V. Mitchener, University of Manitoba; E. A. Morris, President of the Manitoba Beekeepers' Association; and Henry Moore, Secretary, Food Distributors of Manitoba Inc.

Rabbits were unknown in England until introduced from central Europe in the 12th century.

The End of the Trail

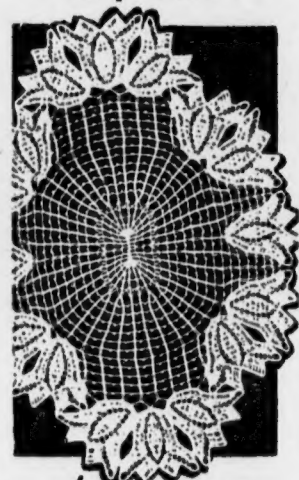

Potatoes Need Good Storage During Winter

The time for potato digging is fast approaching and some thought should be given to potato storage in order to procure good quality tubers throughout the winter months.

The Experimental Farm at Brandon recommends a temperature of 38 degrees F. for seed stock and 40 degrees for table stock to give best results. Lower temperatures tend to develop a sweet flavor. Storing potatoes in the basement of a dwelling house is not satisfactory owing to the difficulty of providing necessary ventilation. Proper basement storage may be obtained, however, by providing an insulated room into which a four-inch pipe is conducted through a window or through a hole bored in the outside wall. A damper on the outside should be installed to regulate the air current. Potatoes will keep better if placed in slatted bins with slatted boards spaced one-quarter to three-eighths of an inch apart to allow circulation of air. Do not store the entire potato crop at one time. Put in a layer of potatoes to about one foot in depth and allow them to cool. The depth of potatoes in the bin should never exceed five or six feet and the bins should not be more than 10 to 12 feet square.

If you are suspicious that your potatoes are diseased, sort the tubers carefully when they are being stored, burn the old tops and make a fresh start with good seed next spring.

Patterns Tulip Time!

by Alice Brooks

Have tulip bouquets at every place at your next luncheon—you'll get compliments galore. Plain picot mesh dollies, tulips done separately, then sewn on.

Easy-to-crochet dollies to be done in fine or heavy cotton. Pattern 7204 is easy to follow.

By Len Kleis

OUR COMPLETE SHORT STORY—

By M. J. COLLINS

"SIT down and relax," Mary told her husband, Dan. "Cathy will be home soon. She and Jan are only at a dance."

"I'll not have any girl of mine gallivanting around the roads until all hours of the night!" Dan Murphy stormed as he paced up and down. "I'll give that young lady such a tongue-lashin' she'll not forget it. As for that young man of hers..."

"You'll do nothing of the sort," Mary said. "And stop shouting, you sound like an Irishman."

"And proud of it, too," he retorted, waving his arms. "There's the blood of kings in the veins of the Murphys."

"If you're not careful the kingly line will lose a member. Remember your blood pressure. Why don't you go to bed?"

"I'll do nothing of the sort. I'm goin' to be here when they get home."

Mary should have known it was senseless to argue with Dan once he'd made up his mind. He had a too vivid imagination. Her knitting clicked busily while he blew off steam.

"I wouldn't mind if she went out with a good Irishman," he growled.

"What's wrong with Jan?" Mary demanded. "He's a nice boy, a bit hot-tempered, I'll admit. Did you know his grandmother was Irish?"

"Well! No, I didn't. What sort

NOW MANY WEAR FALSE TEETH

THE TILLERS

—By Les Carroll

AT EMERSON

New Truck Clearing System Put Into Effect

EMERSON, Man.—A new system of clearing goods entering Canada by truck was put into effect here recently.

Trucks may now bring merchandise into Canada and proceed to inland cities where they can clear their goods with the Customs. The trucks must be closed vans so that they can be "sealed" by the border Customs officials and they must be able to deliver their goods into a "sufferance bonded warehouse" at their inland destination.

At the present time, Glendenning Motorways trucks are brought to Emerson, where the trailers are sealed and Royal Transfer truck cabs haul the trailers to Winnipeg. In Winnipeg they go directly to a bonded warehouse on Wall St., which was built by the Royal Transfer.

Trucks may cross the border

under the above system at any time of the day or night. The new system will mean that Emerson will lose a certain amount of business. Formerly, all trucks had

to be unloaded in Emerson and were required to clear Customs here. This meant that on most days five to 10 trucks spent considerable time in Emerson.

Another MAGIC "sure-fire" Success

JAM UPSIDE-DOWN SHORTCAKES

Combine 1 tbs. soft butter, $\frac{3}{4}$ c. thick jam, 1 tbs. lemon juice and, if desired, $\frac{1}{2}$ c. broken nuts and divide between 6 greased individual baking dishes. Mix and sift twice, then sift into a bowl, $1\frac{1}{2}$ c. once-sifted pastry flour (or $1\frac{1}{2}$ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, $\frac{1}{2}$ tsp. salt, $\frac{1}{4}$ tsp. grated nutmeg and $\frac{1}{4}$ c. fine granulated sugar. Cut in finely 5 tbs. chilled shortening. Combine 1 well-beaten egg, $\frac{1}{2}$ c. milk and $\frac{1}{2}$ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly. Two-thirds fill prepared dishes with batter. Bake in a moderately hot oven, 375°, about 20 minutes. Turn out and serve hot with sauce or cream. Yield—6 servings.

INGERSOLL CHEESE CO. LTD., INGERSOLL, ONT.

JOHN H. P. TURNER (above), a assistant general manager of the Bank of Montreal's western division, with headquarters in Montreal, who will visit Carbon next Monday during a tour of B of M branches in Alberta. Mr. Turner will be accompanied by James M. Jackson, superintendent of B of M offices in this province.

... the letters start. Then from all over the free world come such comments as these from readers of THE CHRISTIAN SCIENCE MONITOR, an international daily newspaper:

"The Monitor is must reading for straight-thinking people. . . ."
 "I returned to school after a lapse of 18 years. I will get my degree from the college, but my education comes from the Monitor. . . ."
 "The Monitor gives me ideas for my work. . . ."
 "I truly enjoy its company. . . ."

You, too, will find the Monitor informative, with complete world news. You will discover a constructive viewpoint in every news story.

D.A.'s Corner

BY STANLEY W. PETTEM

HUNTERS BEWARE

Many farmers throughout the district have coyote-getters set out to control coyotes. Hunters, with dogs in particular, should exercise caution. Warning signs have been set up by the farmer signifying that getters have been set out but these may be weather beaten. Better enquire of the farmer before entering his land.

GRAIN CLUB ACHIEVEMENT DAY

The Grain Club Achievement Day for the Acme, Beiseker and Carbon clubs will be held at Carbon on October 22nd. It is to be hoped that a good turn out will be in attendance.

ROADSIDES

Hundreds of miles of roadsides in the Municipality could be a good source of hay. Mr. C. Ruby, Field Supervisor of Kneehill, this summer has seeded 174 miles of roadsides. Grass, in time, will crowd out the unsightly weeds and will be an unfailing supply of feed.

BANG'S PROGRAM

Vaccination and blood testing for Bang's Disease will start early in October. Dr. Lawrenuk of Drumheller is prepared to do as much of the program as possible. The Council has appointed team captains in each township to line up the work for their township. If you are not approached, and wish to have calves vaccinated or older animals blood tested, leave your name with the Municipal Office in Three Hills.

NOTHER TRACTOR ACCIDENT BRINGS TOTAL TO 13

The farm tractor is a most dangerous implement and already this year it has caused at least 13 deaths in this province. Latest was a 35-year-old farmer of the Mestok district northeast of Edmonton. Almost all of these accidents have resulted from the tractor overturning while being operated on a road or highway.

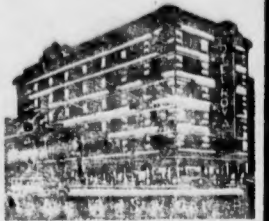

PRICE RISE FORECAST

An increase in the price of farm implements may be expected in the next six months. That forecast was made by one of the top officials of the International Harvester of Canada corporation while on a visit to Alberta. He said the increase in wages of employees and an increase in the price of raw materials made the further advance in implement prices imperative.

SAFETY HINTS ON TRACTOR OPERATION

1. STOP your Tractor and field work for 10 or 15 minutes each morning and afternoon
2. Reduce fatigue and restore energy with a light lunch in afternoons.
3. Keep Tractor speed below 4 miles per hour for off-the-road operations
4. Do not try to relieve fatigue by operating Tractor in Standing Position — Stop and rest.

YOU CAN STOP FASTER THAN THE BIG FELLOW!

CPR Had First Domes

A long forgotten genius in the Canadian Pacific Railway's motive power and rolling stock department came up with an idea at the turn of the 20th century that blossomed into additional passenger revenues for rail lines throughout the continent.

It was the first "dome" car to be used on railway lines and was designed to give passengers a bird's eye view of Canada's spectacular Rocky Mountain scenery. Today the idea has spread throughout the world, particularly in the United States where railway dome cars are a feature of several lines.

In a recent \$38,000,000 order for 155 new stainless steel cars, the C.P.R. included 36 scenic-

dome cars, such as the one shown above in top picture, which will give travellers an unmatched view of this country's scenery from coast to coast. The cars will be placed in service on transcontinental trains next year.

Although the designer of the dome car prototype, shown in bottom picture above, remains unknown, he gave Canada's first transcontinental rail line a head start in railway design. In July, 1902, the world's first dome car rolled out of the shops and into service.

In it, railway passengers could sit in revolving parlor car chairs or reversible seats and have a clear view of Canada's scenery.

The car proved an immediate hit and three others, with modi-

fied improvements, were put into service. But the C.P.R.'s unknown designer had outstripped his era.

Air conditioning and Polaroid glass were unknown and the sun's ultra-violet rays proved uncomfortably warm. The cars were replaced with open-air observation cars, several years later.

The railway reverted back to its original idea recently when it ordered the 36 dome cars—more than 50 years after it first had them on the road.

"Canada's scenery is hard to beat in any corner of the land," a railway official said. "We admit the Rocky Mountain area is the most spectacular, but we believe the cars can be used to advantage from coast to coast."
